First is to my advisors Dr. Sri Hartiningsih, M.M and Triastama Wiraatmaja, M.Si who have patiently spend their valuable time to guide, give suggestions, motivation, corrections to me during the thesis writing process. Beyond that, their criticisms have encouraged me to struggle very hard in finishing this thesis so that I can finish it on time. Without their precious understanding and strong motivation, this thesis would have never found its completion.

Finally, this graduating paper is expected to be able to provide useful knowledge and information to the readers. Moreover, the researcher is pleased to accept more suggestion and contribution from the reader for the improvement of the graduating paper.

Last but not least, my appreciation and special thanks is also extended to FLSP reading class especially students of Mathematics Department who have so patiently in gaining data process of this thesis, and also big thanks to miss Elsa Marina as the lecturer of FLSP class who allowed me to do a research.
